Immunization Policy Statement

Child's Name ______________________________ DOB ______________

The healthcare providers at High Desert Pediatrics strongly recommend following the current immunization schedule as established by the ACIP (Advisory Committee on Immunization Practices) and adopted as standard of care by the CDC (Center for Disease Control) and AAP (American Academy of Pediatrics). The current national guidelines have been shown to be both safe and effective in preventing disease. However, our providers also understand and acknowledge parental concerns regarding immunizations. When parents choose not to follow the current immunization guidelines, the providers at High Desert Pediatrics will try their best to work with the parents so that everyone is comfortable with the care that is delivered. However, any deviation from the immunization schedule is not endorsed by our providers and should never be considered to be a recommendation of medical care. The risks of not following the recommended immunization guidelines include an increased risk of infection for the un-immunized child as well as to others with whom that child may come in contact. Other consequences may also include the inability to enroll in daycare, school, athletic programs, camp programs, and other organized activities due to lack of immunizations. The final decision to follow an alternate immunization schedule or to not immunize at all is the sole responsibility of the parent or guardian. Unless the child has a recognized and documented medical contraindication for doing immunizations as established by the ACIP, High Desert Pediatrics will not provide medical exemptions.

I acknowledge that I have read this document and fully understand it.
